

DUETTE® Shades

LUXAFLEX® Window Fashions is Australia's largest and most inspirational Window Fashions provider for over 50 years. Testing and quality craftsmanship together with a 5 year warranty* makes LUXAFLEX® DUETTE® Shades the perfect choice for your home.

WHY CHOOSE LUXAFLEX® DUETTE® SHADES?

LUXAFLEX® DUETTE® Shades are at the forefront of innovative design, offering the ideal balance between function and energy efficiency together with versatility and style. Available in different fabric translucencies, colours and operating systems, they provide you the perfect window covering solution for your home.

PRODUCT FEATURE

Produced from an anti-static spun bonded polyester fabric, they are dust resistant and easy to clean. Due to their honeycomb structure DUETTE® Shades are an efficient insulator, keeping your home warm in winter and cool in summer, saving on your energy costs.

UNIQUE BENEFITS

LUXAFLEX® DUETTE® shades have more features than any other honeycomb shade on the market. DUETTE® Shades are available in a huge range of fabrics in two pleat sizes and colour co-ordinated components, concealed mountings and supporting cords, for minimal gaps. There are many different operating styles and shapes available to suit your home and child safety features including:

- PowerRise Lifting System, a battery operated system.
- ULTRAGLIDE® Lifting System, a retractable pull cord that maintains a constant length.
- Vertiglide Shades are the ideal choice for side to side openings, no cord, chains or wands.
- Duo-Lite, combining room darkening and translucent fabric into the one blind for light control and privacy.
- Top down bottom up operation for increased flexible light control.
- New LiteRise Operating System, no cords just use your fingers to raise and lower your blinds.
- Can be arched, angled or made into a Skylight for complete versatility.

"I love living with LUXAFLEX® DUETTE® Shades because they keep my home warm in winter and I was able to find a solution to my arched window" ...LUXAFLEX® Customer.

LUXAFLEX®

WINDOW FASHIONS

Why choose DUETTE® Shades versus other window covering styles?

- Offers the highest level energy efficiency compared with any other window covering. Achieved through the unique cell structure of the fabric, and minimal gaps around the product when fitted.
- Large range of operating options, styles and fabrics to suit the majority of windows and doorways, allowing you to maintain a consistent style of window covering throughout your home.
- Easy to clean with minimal care, the 100% Polyester fabrics are anti-static meaning they repel dust. Any dust that does settle on the shade is easily removed with a feather duster or light vacuum, and is great for families with children as the translucent fabric is washable.#
- The back of the DUETTE® Shade is white providing light reflection and UV protection, which reduces heat passing through the blind into the room. This also provides a neutral appearance from outside while allowing colour on the shading inside the room.

Why choose DUETTE® Shades versus competitor products?

• A brand you can trust

LUXAFLEX® Window Fashions first introduced honeycomb shades to the Australian market and leads the way in product development and innovation, providing you with the latest range of options from a market leader in Soft Shade window fashions.

• Durable and easy to maintain

The spun bonded polyester DUETTE® Fabric is not the same as some other cellular products that have cells which can come apart over time. Translucent DUETTE® Fabric can be submerged in water and washed by hand to remove stubborn stains or spills. Some inferior cheaper products when cleaned can fall apart or may not retain their shape.

• Largest range

Matching fabric covered headrail, matching cord & bottomrail & designer tassels.

• Piece of mind

Backed by a 5 year warranty* by a reputable long standing brand providing you with piece of mind in the unlikely event you need to claim.

The DUETTE® Shades Range Overview

- Fabric choices of 10mm, 20mm single cell and the exclusive 20mm LUXAFLEX® DUETTE® Architella Shades.
- Range of sheer, translucent and blackout fabrics to soften the light and/or provide complete privacy.
- Large choice of operating methods.

Easy to maintain

DUETTE® Fabrics are designed for minimal care and cleaning. Dusting and periodic vacuuming will keep your shades looking beautiful. DUETTE® Shades can also be spot cleaned with a soft cloth or sponge. All fabrics are designed to repel dust and dirt.

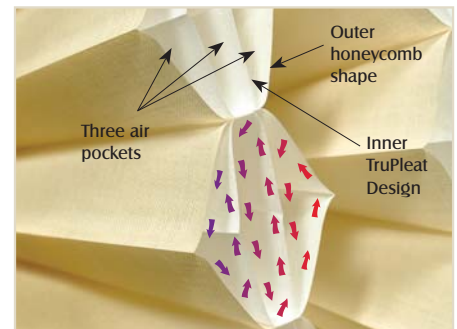

The DUETTE® Shades Range Overview

DUETTE® Architella Shades

Patented honeycomb within a honeycomb construction makes DUETTE® Architella Shades unique and effective in insulating your home.

- For greater energy efficiency. The unique DUETTE® Architella Fabric provides three distinct air pockets, dramatically increasing the products ability to keep heat in and cold out.
- For more uniform appearance. The inner TruPleat Construction keeps every shade crisp and consistent from front to back and top to bottom.
- Saves you money on heating and cooling costs. DUETTE® Architella Shades can reduce the heat transfer through a window by up to 83%. Independent modelling has shown that this in turn can reduce an average home's heating costs by up to 43%.*

Choice of operating methods and design options

TOP DOWN BOTTOM UP

Lower the blind from the top down so you can allow light through the top of the blind and provide a view, whilst maintaining privacy on the bottom of the window. This is opposite to traditional roller blinds & roman shades which raise from the bottom meaning privacy is lost when the blind is partly raised.

DUO-LITE DESIGN OPTION

Provides the highest level of flexibility with two blinds in one, to achieve day time light diffusion with a sheer blind and night time privacy in blackout for complete convenience.

ULTRAGLIDE® Shades

LUXAFLEX® ULTRAGLIDE® Shades uses a revolutionary retractable cord mechanism to provide a constant cord length. This is ideal for child and pet safety as there are no long cords hanging down when the shade is raised. Can be used on a traditional top down, top down bottom up or DUETTE® Duo-Lite Shades.

LITERISE OPERATING SYSTEM

Raises the shade from the bottom by hand, pushing up the bottom rail and pulling the bottom rail down to lower the shade. Featuring no exposed cords, this is the ideal manual control option for child/pet safety, other than investing in the premium PowerRise or Motorised Remote Control Options.

POWERRISE LIFTING SYSTEM

Featuring a battery operated remote control system to raise and lower the blind with the touch of a button on a remote control. With no exposed cords, PowerRise Lifting System is the ultimate choice for convenience and child/pet safety. The PowerRise Lifting System is ideal for applications where wiring is difficult, as the blind operates using battery power.

MOTORISED

Featuring a hard wired motor in the blind headrail to raise & lower the shade by a remote or wall switch. This is the premium control choice, and can be wired into home automation systems.

VERTIGLIDE SHADES

The ideal solution for sliding doors, the fabric runs from side to side vertically suspended from a single track system. With a very small side stack, this is the ideal solution for doorways to allow maximum light control.

SKYLIGHT

Featuring side channels for full light coverage, the skylight operates by sliding the shade with a control stick. Can be used with both light filter fabrics or blackout for complete heat and light control.

FIXED SHAPES

Many shapes such as triangles and arched windows can be covered with a fixed DUETTE® Shape. Teamed up with an operating blind below them, they provide an ideal solution to those unusual shape windows in many homes.

OPERATING SHAPES

The Exclusive LUXAFLEX® DUETTE® Operable Arch allows you to raise and lower the fabric, unlike a fixed shape.

* Opaque (foil lined) fabrics cannot be submerged in water.

* Savings are based on the installation of fully-recessed, reveal-mounted DUETTE® Architella Opaque Shades in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation. The National Australian Built Environment Rating System, or NABERS, is a government environmental performance rating tool. NABERS is uniquely designed for Australian households and will help you understand how energy and water are used in your home and take action to make improvements.
