

Safety Tips For Your Family

We suggest you adopt these simple tips to ensure the well-being and safety of your children and pets.

1. Check your blind and curtain cords

- ✓ Check your blinds are genuine LUXAFLEX® Window Fashions and have been installed correctly with Child Safety Cords and Cleats if they are corded window coverings. You should do this in your home and also when on holiday, when staying with friends and relatives and if renting.
- ✓ Check for loose or looped cords that your child can reach from the floor or by climbing on furniture.

2. Secure loose cords out of reach

- ✓ Check if your blinds or shades have been installed with compliant child safety devices. It is important to note, that all LUXAFLEX® Window Fashions will be supplied with such devices to ensure your children are safe and secure.
- ✓ Never secure these devices with materials that fail when a load is placed on them.
- ✓ Ensure you can fix your unsafe cords and chains out of reach.

3. Choose safe blinds and curtains - only buy LUXAFLEX® Window Fashions which:

- ✓ Are installed with warning label Swing Tags to remind you of dangers to children.
- ✓ Are provided with an approved child safety mechanism to secure cords/chains.
- ✓ Have no cords/chains such as motorised Shades, LiteRise Lifting Systems, Vertiglide Operating Systems and PowerRise Operating Systems, Wand Control Systems, winch or tape systems.

4. Keep children away from all cords/chains

- ✓ Move anything a young child can sit in, stand in, or climb on (like cots, highchairs, beds, sofas, tables, chairs and bookshelves) away from windows that have cords/chains.

Child Safety with LUXAFLEX® Window Fashions

www.luxaflexchildsafety.com.au

Creating a Safer Environment for Your Children

Many consumers think of privacy, style and comfort when they select window coverings for their home, however if you have young children, then child safety should be another important consideration when selecting window fashions for your home.

All LUXAFLEX® Window Fashions that are installed correctly will comply with the Trade Practices (Consumer Product Safety Standard – Corded Internal Window Coverings) Amendment Regulations 2010 (No. 1)

All LUXAFLEX® Window Fashions come with:

- ✓ Child Safety Warning Swing Tags
- ✓ Installation Instructions
- ✓ Safety Cords or Cord Tensioners for corded window coverings

With trends in cordless window fashion design gaining momentum, our extensive selection of safe operating systems including motorisation, the exclusive LUXAFLEX® LiteRise Lifting System, Vertiglide System and PowerRise System for DUETTE® Shades with their streamlined design, are rapidly becoming popular options.

Many safety features have been incorporated in the LUXAFLEX® Window Fashions collection of window coverings. These features are detailed in this brochure along with a checklist that helps you to determine which LUXAFLEX® Window Fashions are the most suitable for your home.

Cordless Control for Enhanced Child Safety

Motorisation

A wide variety of LUXAFLEX® Window Fashions are offered with motorised options to eliminate cords and allow blinds, shades and awnings to be operated at the touch of a button, remote control or wall mounted switch.

The motors supplied are of the highest standard, are reliable, safe and created for simplicity, reduced noise and increased internal comfort.

Motorised Blinds, Shades and Awnings can be incorporated in "Smart Home" and Building Management Systems to minimise energy usage for heating and cooling. Available for LUXAFLEX® DUETTE® Shades, LUXAFLEX® SILHOUETTE® Shadings, Roller Blinds, Venetian Blinds, LUXAFLEX® Fabric Awnings, Tempo Awnings and External Sunscreens.

PowerRise Operating System

The battery and optional hard wired PowerRise Operating System offers a cordless remote control solution.

Cordless Lifting Systems

Corded window fashions are also available in "cordless" styles through the use of spring-loaded mechanisms or simple wands.

LiteRise Lifting System

LUXAFLEX® DUETTE® LiteRise Lifting System is a completely cordless system for operating energy efficient DUETTE® Shades, for the ultimate in child safety. With the LiteRise Lifting System, your DUETTE® Shade is simply raised or lowered with your hand on the bottomrail of the blind.

Vertiglide Operating System

DUETTE® Vertiglide Shades have pleats orientated vertically instead of horizontally. They are operated by hand with no cords. They are the perfect shades for sliding glass doors or as sliding room dividers or for large glazed windows within your home. Vertiglide Shades are available with any 20mm DUETTE® Fabric.

Wand Control

The wand option on select LUXAFLEX® Window Fashions allows all functions to be controlled by a single wand without the need for operating loose cords. Available for LUMINETTE® Privacy Sheers and Panel Glide.

LUXAFLEX NEWSTYLE® Shutters

LUXAFLEX NEWSTYLE® Polyresin and Basswood Shutters are cordless by design, eliminating the potential safety hazard posed by operating cords. Both products are available in a large collection of colours to suit your home décor.

Safe Cord Control Systems

ULTRAGLIDE® Lifting System

ULTRAGLIDE® Shades incorporate an innovative lifting system that allows you to operate your shade using a single retractable cord maintaining a consistent cord length regardless of the position of the blind. Available for DUETTE® Shades, PIROUETTE® Shadings and SILHOUETTE® Shadings.

EasyRise Lifting System

The EasyRise Lifting System offers a continuous cord loop for easy movement of the shade. This cord is fixed to the wall so it cannot form a loop. Available for DUETTE® Shades, PIROUETTE® Shadings and SILHOUETTE® Shadings.

Chain Drive for Roller Blinds & Roman Shades

Adaptable and versatile, LUXAFLEX® Roller Blinds combine sophisticated technology with a variety of durable fabrics from room darkening to light filtering with a wide range of styles and options, including the classic Standard Chain Drive Roller Blinds, Chain Drive Spring Assist Roller Blinds, Dual Bracket Roller Blinds, Linked Roller Blinds or Motorised Systems to complement your home design. The loop chain is secured to the wall so it cannot form a loose loop.

Combination Wand / Cord

The combination of wand and cords for Vertical Blinds, LUMINETTE® Privacy Sheers and Aluminium Venetian Blinds, integrates both tilt and traverse functions into one easy control that keeps the cord taut.

Special Safety Features

Cord Tensioner

Our cord tensioner, when properly installed, holds looped cords taut to reduce the risk of a child becoming entangled. Available for a range of products.

Cord Cleat

Designed for standard cordlock products, the cord cleat allows lift cords to be tightly wrapped around it when the blind is raised for both enhanced safety and a neater appearance at the window. Available for COUNTRY WOODS® Venetians, BEYOND WOODS® Blinds, DUETTE® Shades, Roman Shades and Aluminium Venetian Blinds.
